ONE-STOP PACKAGING SOLUTION

AJANTA PACKAGING

We are excited to introduce AJANTA PACKAGING, a subsidiary of the renowned AJANTA WOOD PRODUCTS, which has been a trusted name in the industry since 2001. Ajanta Packaging builds on the legacy of its parent company, delivering innovative and high-quality wooden packaging solutions tailored to modern business needs.

Our Commitment

Ajanta Packaging stands for quality, innovation, and customer-centricity. We aim to redefine wooden packaging standards by leveraging over two decades of expertise from our parent company.

Why Choose Us?

- Backed by 23+ years of experience from AJANTA WOOD PRODUCTS.
- Expertise in supplying high-quality wooden packaging solutions.
- Ability to cater to customized specifications and bulk orders.
- Strong customer base comprising national and multinational companies.

Forced Hot Air Treatment Plant

We also have FHAT (force hot air treatment) facility to protect the wooden pallets & other wooden packing material from the defects of fungus & bark.

ISPM 15 is the 'international standards for phytosanitary measures publication No. 15: Guidelines for regulating wood packaging material in international trade.'

ISPM 15 was developed to address the global spread of timber pests by regulating the movement of timber packing and dunnage in international trade, ISPM 15 describes phytosanitary measures to reduce the risk of introduction and/or spread of quarantine pests associated with solid timber packing material (includes dunnage).

ISPM 15 affects all wood packaging material like pallets, crates, dunnages, etc. requiring that they be debarked and then heat treated or fumigated with methyl bromide and stamped or branded, with a mark of compliance. This mark of compliance is colloquially known as the "wheat stamp".
